PROFESSIONAL SUMMARY

Senior Software Developer with 18+ years of experience developing and maintaining enterprise applications, with a strong focus on Java backend development, system integration, and full-stack delivery. Experienced in business-critical international environments, financial services, software architecture, testing, and technical coordination. Use OpenAI Codex and AI-assisted workflows for analysis, implementation, code review, testing, debugging, and documentation while retaining full responsibility for technical decisions and validation.

CORE TECHNOLOGIES

Core: Java | Spring Boot | REST APIs | SQL | JUnit | Git |
Software Architecture | System Integration

Additional: Angular | React | JavaScript | Node.js | PHP |
Docker | Kubernetes | CI/CD

AI-AUGMENTED ENGINEERING

Daily use of OpenAI Codex and ChatGPT for technical exploration, implementation, refactoring, code review, testing, debugging, and documentation. AI-generated output is understood, reviewed, and validated before delivery.

PROFESSIONAL EXPERIENCE

BNP Paribas España, Madrid | Senior Backend / Full-Stack Engineer (Contract)

Aug 2025 – Jan 2026

- Designed and developed a core microservice for interbank payment processing using Java 19, Spring Boot, and MySQL within a 30+ engineer distributed Agile team across Spain, France, and Germany.
- Optimized existing microservices and database integration, improving application performance, reliability, and data security.
- Contributed to Angular frontend improvements, architecture discussions, code reviews, clean-code practices, and internal technical improvements across international teams.

Kyndryl Argentina | IT Specialist

Sep 2021 – May 2025

- Supported software architecture, technical coordination, process improvement, and delivery across development teams.
- Led Java best-practice sessions, reviewed technical approaches, mentored junior developers, and promoted standards for code quality, testing, and documentation.
- Created internal tools and working methods that improved prioritization, time tracking, communication, knowledge sharing, and collaboration.

IBM Argentina | IT Specialist

Dec 2007 – Aug 2021

- Progressed from software packaging coordination and architecture to Java development, senior software engineering, and software architecture over 13+ years.
- Coordinated international software packaging accounts and served as a key focal point during the migration of the Software Packaging Factory from the United States to Argentina.
- Built and maintained enterprise applications, backend services, and integrations using Java and Spring; implemented JUnit testing practices and contributed to architecture, code reviews, and delivery standards.

ADDITIONAL EXPERIENCE

GDEBA – Government of the Province of Buenos Aires | Software Consultant

Mar 2023 – Sep 2023

Concurrent engagement. Supported technology transfer and architecture analysis for a large-scale government document platform; developed diagnostic procedures and integration guidelines to improve reliability, performance, security, and interoperability.

Compra Gamer (Newton Station SRL) | Senior Backend Developer

Mar 2021 – Jun 2022

Concurrent role. Developed PHP/MySQL backend services and REST APIs for e-commerce and internal systems; improved business logic, data access, React integration, and development processes using Docker and BPMN.
